

Manage accounts quickly and easily via a tool

Cash & Multibanking Tool

Our tool enables you to keep track of your finances at all times using different liquidity overviews. Process all of your payment transactions across all your accounts with ease in the Cash & Multibanking Tool, and save time in the process.

Accounting manages accounts with three different banks.

The benefits for you

- A portal for managing all your bank accounts
- The dashboard provides you with a quick, straight-forward overview of your accounts and liquidity. Use the consolidated view to optimize cashflows.
- Payments can be entered and approved for all affiliated banks.
- Payment approval based on self-defined authorizations for all third-party banks.
- Many other functions thanks to dynamic dashboards with multi-banking widgets, self-administration and so on.

Using PostFinance's Cash & Multibanking Tool, you can combine, review and manage all your liquidity in a single tool with ease.

Preconditions

- Business account at PostFinance
- E-finance
- At least one additional banking relationship

Here's how it works

Manage all your accounts centrally with the Cash & Multibanking Tool using your e-finance login:

- Third-party bank accounts connected via EBICS or SWIFT
- Enter payments directly in the Cash & Multibanking Tool or upload them as a file
- Liquidity overview of all accounts, including preview based on payments already entered
- Self-management of authorizations for third-party bank accounts
- Plan liquidity for all accounts

If you use an accounting system, you can import your payment files via an EBICS connection and manage them centrally in the Cash & Multibanking Tool.

Prices

Benefit from a free three-month trial period, The service is then available from CHF 10 per month. Current prices can be found at postfinance.ch/prices-bc.

Liquidity overview

- Account information no longer needs to be obtained from different sources.
- You can access a range of overviews of banks, currencies and companies/company structures.
- Adjustable, user-defined view.
- All overviews can be exported as a .csv file, e. g. for processing in Excel or import into an ERP system.

Payment transactions

- Enter payments efficiently thanks to an address book function that allows you to save and search for recurring payment recipients.
- Based on the account and currency entered, the system identifies what the most suitable payment format is, and offers the appropriate input fields.
- Quick overview of all outstanding payments or payments pending approval.

Our Cash & Multibanking Tool is the perfect tool for managing your company's liquidity.
