

## Focus Responsible

This investment focus invests in financial instruments that account for environmental, social and governance (ESG) factors.

The aim of the “responsible” focus is to account for environmental, social and governance (ESG) factors that have a potential impact on investment performance. Investments in gold are avoided. In the responsible focus, the domestic market is taken more into account than the rest of the world. In addition to Swiss bonds and shares, bonds and shares from all over the world are added for diversification. Investments are also made in Swiss real estate.
