

Focus Sustainability

This investment focus takes into account sustainability criteria relating to the environment, society and corporate governance.

The aim of the sustainability focus is to be a more eco-friendly investor. This means that as an investor, you can, for example, actively contribute to a reduction in CO₂ emissions. For environmental reasons, we also avoid investments in gold in this focus. However, we do not view sustainability as solely a question of protecting the environment; when choosing which instruments to invest in, we also consider additional sustainability criteria relating to society and company management. In the sustainability focus, the domestic market is represented somewhat more strongly than the rest of the world.
