

Focus Swiss

With a Swiss focus, your portfolio will place a greater focus on the domestic market, while ensuring it does not neglect global diversification.

A Swiss investment focus enables you to benefit significantly from positive performance on the Swiss market. To increase diversification, fixed income and equities from all over the world are added to your portfolio. Your portfolio will also invest in Swiss real estate and in gold. If you choose this focus, foreign currency risks are reduced, and for this reason, these are hedged against the Swiss franc – completely in the case of bonds, and partly in the case of shares and gold.
