

Can be combined with terminals for sales on-site

E-Payment Module for Checkout All-in-One and Checkout Flex

Online checkout with flexible and simple solutions

It's now very easy to set up an online shop in just a few clicks or with the support of a web agency. The right payment solution for your customers has to be integrated separately.

Our E-Payment Modules for **Checkout Flex** or **Checkout All-in-One** offer you two variants that can be integrated into your online shop quickly and easily as a plug-in or connected service.

Why use the E-Payment Module for Checkout All-in-One?

For a small retailer like you, we recommend the E-Payment Module for Checkout All-in-One. You benefit from only having to conclude one contract for payment methods and from receiving the preconfigured payment methods at a standard transaction fee of 2.5 percent.

We would be happy to handle the administrative work involved in concluding the contract for the various payment methods.

Why use the E-Payment Module for Checkout Flex?

For medium-sized or large retailers like you, we recommend the E-Payment Module for Checkout Flex. You enjoy great freedom in your choice of acceptance partner and the range of payment methods. Via our Checkout Backoffice, you can request quotations from the integrated acceptance partners and receive individual quotations directly, with conditions that vary from one payment method to the next.

New with Checkout Flex: preconfigured basic payment methods

We can offer preconfigured basic payment methods via the acceptance partners Wallee/SnapSwap. You also benefit from the fact that operational activation takes just five working days and that you know the transaction fees before the contract is concluded.

The optimal variant is selected based on your requirements and the number of payments processed:

E-Payment Module for Checkout All-in-One
Easy and quick

E-Payment Module for Checkout Flex
Maximum flexibility
