

# Attract more customers for eBill

Best practice

**PostFinance** 

# Foreword

You already know the benefits of eBill: as an invoice issuer, you save time and resources, and you can be sure of receiving payments. What's more, your customers benefit from a convenient, secure payment method they can access in e-banking itself.

This added value is a winner. Both the number of invoice issuers and recipients and indeed eBill transactions is rising all the time.

## **Win your customers over to eBill**

Let's continue getting more eBill customers together. In addition to general marketing campaigns we are conducting together with SIX, you also have the potential to win more customers over to eBill yourself.

## **Use best practices to acquire more eBill users**

Find out from the best practices laid out over the following pages about:

- How to draw the attention of your customers to eBill
- How to get the most out of eBill with your customers
- How to persuade as many customers as possible to add your company as an invoice issuer

We will be happy to assist you with our many years of expertise and experience.

# eBill usage trends

## Current data and facts

With eBill your customers no longer receive your invoices by post or e-mail, but in e-banking itself – precisely where you pay them. An eBill invoice saves on resources and paper, whilst also providing a 100% secure payment transaction solution.

# 72%

**of Swiss households**

With more than 3 million users, eBill is used by two thirds of all Swiss households.

# 99%

**Bank coverage**

All major banks in Switzerland offer eBill. This way, your customers receive your bills directly via online banking.

# 4400

**Many companies** already rely on eBill for their invoicing – and the number is rising.

# 69.6 m

**Transactions**

eBill transactions in 2023. Every month, companies send out millions of eBill invoices.

# 20%

**Growth**

Annual growth in transactions by 20% in Switzerland.

# 99%

**On time**

Invoices are paid on time before or by their due date.

SIX 2023 data

# Potential of eBill

## eBill's growth on the invoicing market for private individuals

Digital invoicing is on the rise and is becoming increasingly popular. Today, around 400 million invoices are being sent in the B2C segment, and the proportion of eBill invoices is growing at a disproportionately high rate every year.

As an eBill invoice issuer, you too can benefit from this growth if more of your customers choose to receive eBills.

The growth targets of SIX assume that 60% of B2C invoices will be sent as e-bills by 2028.

The proportion of e-banking users is very high in Switzerland. Around 70% of the general public / of PostFinance customers already use e-banking, and are essentially accessible eBill prospects. 89%<sup>1</sup> of the population know what eBill is.

<sup>1</sup> representative study with GFS Bern (April 2022)

# What PostFinance is doing to promote eBill

Marketing campaigns focusing on private customers

With a range of joint communication measures, SIX and the participating financial institutions are constantly ensuring that payment with eBill is becoming better known and more widely used among the general public. PostFinance has already launched several co-branding campaigns, as the following examples show:

## Newsletter

## Social media

## HTML banners

## Influencer marketing

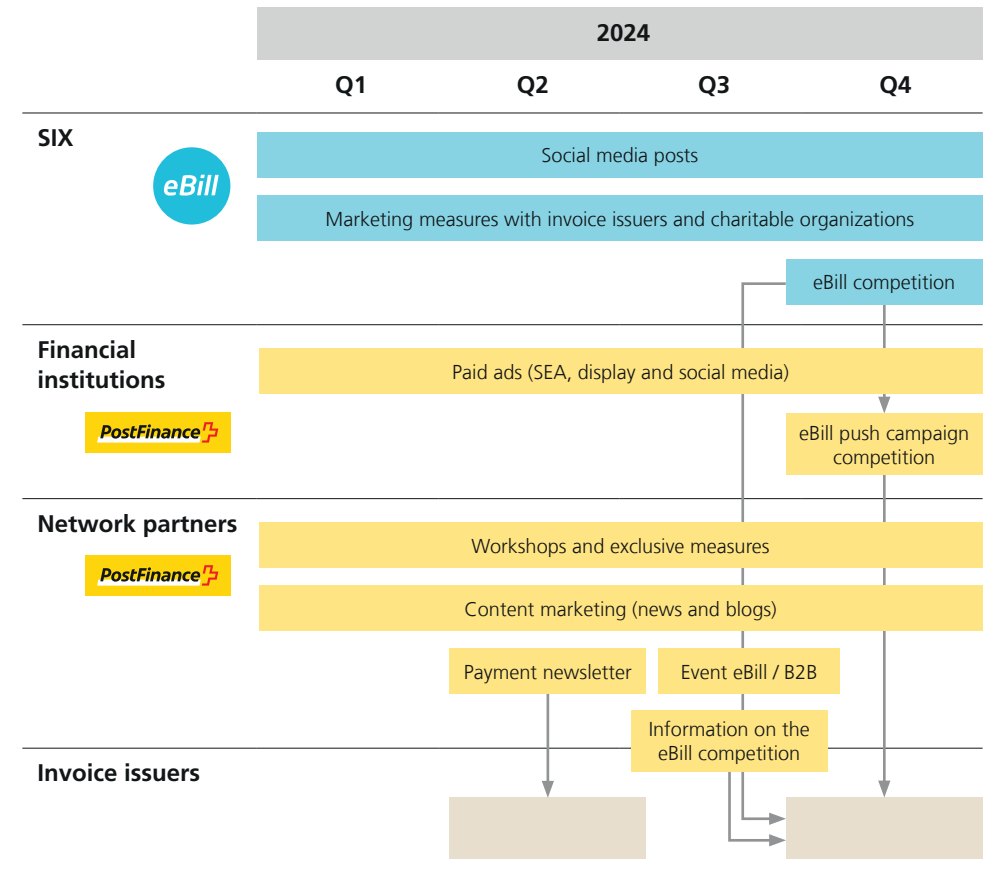

## Website integration

# Tip

Coordinate your activities with higher-level measures

Take a close look at the higher-level communication measures pursued by SIX and PostFinance in order to coordinate your own eBill promotional measures.

We reserve the right to modify the measures listed at any time without any additional communication.

# What you can do to gain new eBill users

Possible measures and benefits

## Increase awareness

Raise awareness of eBill among your customers by talking about eBill on your own channels, whether on sent invoices or in your newsletter. Our ideas on implementation will be of help.

→ **Best practice 1**

## Optimize your processes

It couldn't be easier to bring on board all customers who would prefer to receive their invoices via eBill. There are useful functions available for this purpose, such as Look-up and your own sales processes.

→ **Best practice 2**

Ensure accessible and easy registration to eBill and download your eBill registrations on a regular basis.

→ **Best practices 3/4/5**

## How you can expect to benefit from gaining more eBill users

- Less effort with billing:  
You save on resources and on costs
- Reliable receipt of payments
- Fewer errors when receiving invoices
- Positioning as a digitally advanced company
- Green corporate ethics for a paperless future

## Communicate via your own channels

### Best practice 1

Be it invoices, newsletters or competition: our experience shows us that in-house communication channels are ideally suited to persuading customers of the benefits of eBill.

In best practice 1, we will show you how to devise and implement effective measures in just a few steps. Our recommendations are based on the results of our own eBill campaigns and feedback from customers who have already implemented their own eBill measures.

Tip: If you go to [postfinance.ch/ebill-marketing](https://postfinance.ch/ebill-marketing), you will find free marketing materials to help you implement your measures.

# Make a start with straightforward measures

## Best practice 1 – eBill promo

### Where to start?

Use your current communication channels, e.g. the invoices or newsletters you send, to persuade your customers to start using eBill. You will find useful marketing materials that will help you implement these measures with ease here: [postfinance.ch/ebill-marketing](http://postfinance.ch/ebill-marketing)

#### eBill logo on invoices

The invoices you send can be a very effective way of raising your customers's awareness of eBill. To do this, use the "eBill teaser".

#### eBill information flyer

Convey the key benefits of eBill to your customers in a clear summary on a single page.

Incorporate your logo and be sure to include branding on your information flyer.

#### E-mail newsletters

Persuade your customers that eBill is worthwhile with an article in your newsletter.

#### eBill information flyer

Make use of text module templates to talk about eBill. Either use these as they are, or adapt them to your specific requirements.

#### Show

Try drawing attention to eBill with an advertisement in your magazine for customers or employees. You can use an advertisement template to help you.

#### Footer

You can incorporate the footer template into your website as a navigation element or as something to enhance the look of your e-mail signature.

# Additional measures

## Best practice 1 – eBill promo

### Go the extra mile!

Incorporate other channels into your eBill advertising and combine offline and online activities to reach as many customers as possible.

#### Banners

#### Website / news blog

#### SMS / push notifications

#### Social media

Use a static or HTML banner on your website, or as part as an advertising drive. You will find the templates amongst the marketing materials.

Draw your customers' attention to eBill as a payment method on your website (e.g. on the landing page or in a blog post).

Use SMS/push notifications to reach younger target audiences and persuade them to use eBill.

Post on social media and link to your own landing page where customers can read up on eBill and the payment methods you offer.

# On top measures

## Best practice 1 – eBill promo

### Individual implementation

Are you looking for other ideas on how to persuade your customers to start using eBill?  
Here you will find effective ideas and suggestions, for instance running an eBill competition.

#### eBill flyer with competition

Design an eBill flyer and combine it with a competition. This will encourage your customers to use eBill and to add your company as an invoice issuer.

Enable your customers to benefit from SIX's eBill competition! (See page 7.)

Use your communication channels (website, flyers included when sending paper invoices, newsletter articles, etc.) to promote the competition.

#### eBill cashback

Launch a cashback campaign where you could, for instance, give the first 5,000 customers who select the "Activate eBill" option 10 francs worth of credit on their next bill.

#### Call Center / Support

Train your call center or support workers to try and persuade your customers to register for eBill if they have any questions about the bill they've received.

#### Fee-based paper billing

Charge a processing fee for sending paper bills, and in turn give your customers a financial incentive to use eBill.

A man with a mustache and glasses, wearing a light green t-shirt, is standing at a wooden desk in a modern office. He is looking at a computer monitor and has his hands on a white keyboard and mouse. The office has large windows, a potted plant, and warm lighting. A dark grey text box with a yellow horizontal bar at the top right is overlaid on the right side of the image.

## Use the Look-up function to find new eBill recipients

### Best practice 2

By using the Look-up feature, you can identify those customers that want to receive eBill invoices automatically.

Here's how: eBill invoice issuers can query their customers' e-mail addresses or company ID numbers to check whether they are already registered as eBill users and have activated the "Automatically add invoice issuers" setting. Over a million eBill users have already activated this option.

If this applies to one of your customers, you can send them their first invoice via eBill right away.

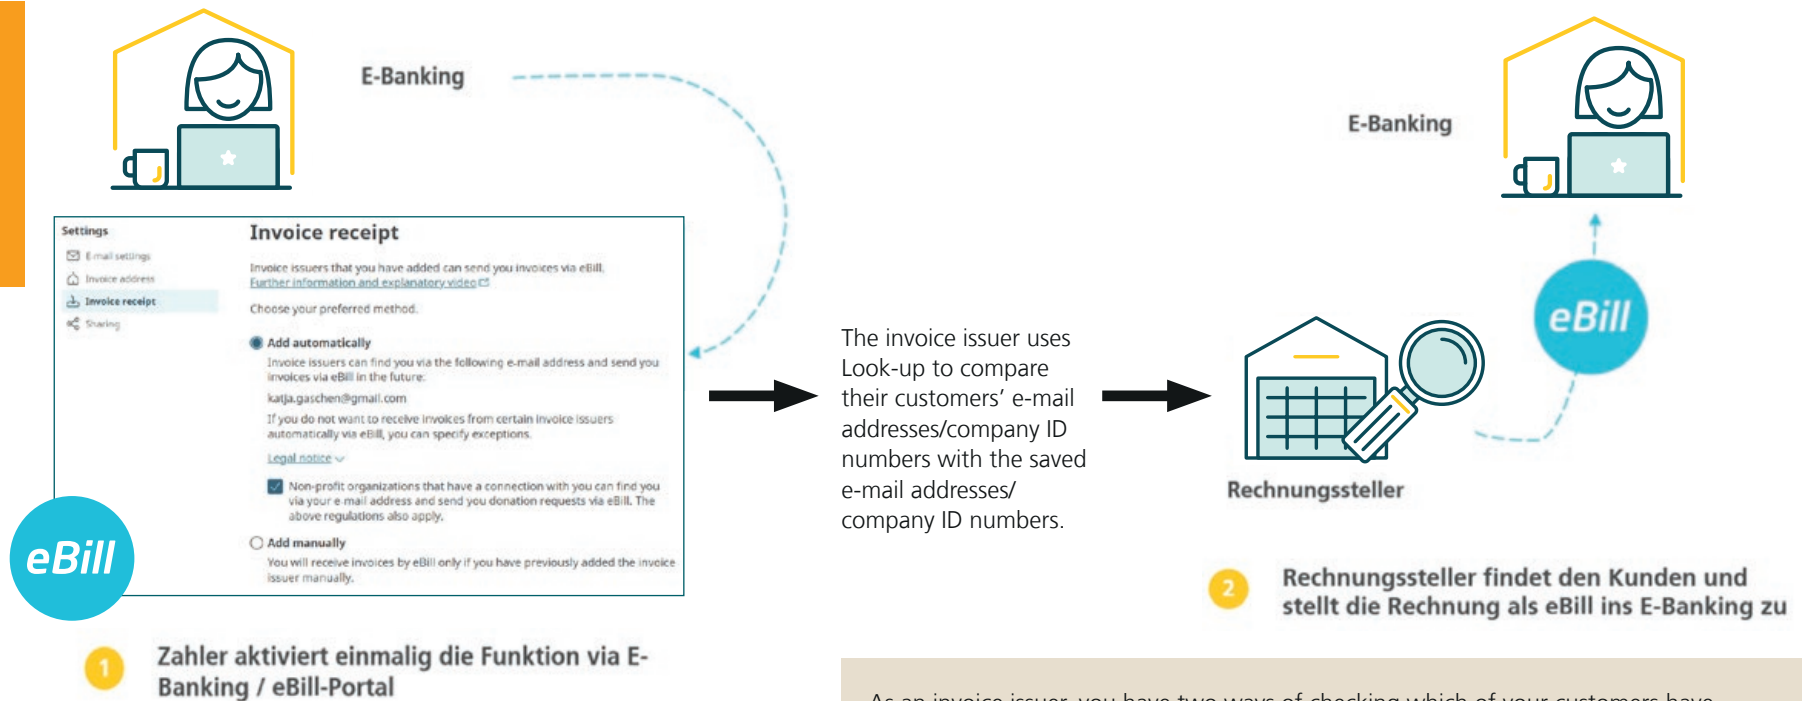

# Identify those customers of yours who prefer eBill

## Best practice 2 – Look-up function

### Potential

By selecting the “Add invoice issuers automatically” setting, the invoice recipient is consenting to having eBill invoices sent to their e-banking or mobile banking account. With the Look-up function, you as invoice issuer can view these customers and add them directly to your eBill recipients. This allows you to gain more eBill customers with very little effort.

More than 1 million users have already activated the “Add invoice issuers automatically” function and are ready to receive invoices via eBill. And the number is growing!

As an invoice issuer, you have two ways of checking which of your customers have enabled the setting “Add invoice issuers automatically” and are prepared to receive invoices via eBill:

- Automated query via a web service that you create and integrate into your business
- Manual query via the [invoicing portal](#)

# Here's how to do it

## Best practice 2 – Look-up function

### PostFinance recommendation

#### Option

**Look-up function via web service  
(automated solution)**

**Look-up function via eInvoicing portal  
(manual solution)**

#### Description

As an eBill invoice issuer, implement the Look-up query in your web service for PostFinance. With an automated web service query, you can use the e-mail address or the company ID number to find out whether delivery to eBill is possible for a specific customer.

As an eBill invoice issuer, you log into the eInvoicing portal and query individual e-mail addresses manually. A bulk upload of multiple e-mail addresses is not possible.

#### Advantages

The query is automated and is therefore always up to date.

Information on web services:

- PostFinance offer:  
[Billing Solutions manual](#)  
→ Section 11.2.2  
Web services
- Technical integration:  
[Web services manual](#)

Can be used by all PostFinance invoice issuers.

#### Procedure

You as the invoice issuer or your software partner must integrate the PostFinance web service and query the "GetEBillRecipient-SubscriptionStatus" method.

eInvoicing portal link:

- Link [eInvoicing](#)

## Make the eBill registration form as straightforward as possible

### Best practice 3

If a customer has decided to add your company as an invoice issuer, then the registration process must be as straightforward as possible. This is where the login screen plays a key role. Be sure to keep the screen as simple as possible so your customers don't abandon the registration process.

Tip: Remember that customers rarely have information such as a customer number – especially if they come to learn about eBill through advertising campaigns and if they don't have an invoice from you.

# The easier the process is, the more customers will sign up

## Best practice 3 – eBill registration form

### Recommendation

Simplify your eBill registration form, and in turn reduce the number of aborted registrations in the process. Make it as straightforward as possible for your invoice recipients to add your company as an invoice issuer for eBill.

### Goal

The only way to get as many people registering for eBill as possible is with a registration form that is both straightforward and clear.

**eBill**

### Anmeldung

Nach der Anmeldung zur E-Rechnung können Sie inskünftig Ihre Rechnungen von ~~Unserem~~ einfach über das E-Banking-Portal empfangen und prüfen. Der einzige Unterschied ist, dass Sie kein Papier mehr erhalten. Haben Sie bereits einer automatischen Belastung (SVIDO) zugestimmt? Diese läuft auch nach der Anmeldung zur E-Rechnung weiter. Die E-Rechnung erhalten Sie in diesem Fall als Anweisung im E-Banking-Portal. Sollten Sie die E-Rechnung nicht mehr wünschen, können Sie sich jederzeit wieder abmelden.

Name / Adresse    Name  
Street  
Postcode/town

Teilnehmer-Nr.    123456789

Zusätzliche Daten (\* obligatorische Felder)

 Kunden-Nr. \*      
Rechnungs-Nr. \*      
E-Mail \*   

Kostenlose Rechnungsbeflege per E-Mail abonnieren

Additional details: Invoice issuers can define individual supplementary text and up to three extra identification features (e.g. customer number). PostFinance advises against using additional identification features as they complicate registration for eBill recipients, and lead to more people abandoning the registration process altogether.

## Download your eBill registrations on a regular basis

### Best practice 4

Ensure that you download the registration data for eBill regularly and that changes to mailing channels are updated. Decide who is responsible for processing registrations for each channel and how frequently the registrations should be processed.

You should also check whether your software allows you to download registration data automatically and change invoicing channels directly (daily or, at a minimum, before billing runs). This is the simplest way to process registrations.

# Activate registrations

## Best practice 4 – Download eBill registrations quickly

### Here's how it works

The invoice recipient has registered for eBill and adds you as an invoice issuer. In other words, they would like to receive invoices via eBill in future. To make this possible, you must be active.

### Important questions for processing eBill registrations

eBill registrations can be processed in a range of different ways.

You should decide on the following questions:

- How will the data be downloaded (in which channel, how often, by whom, etc.)?
- How do you change the mailing channel in your software (ERP)?

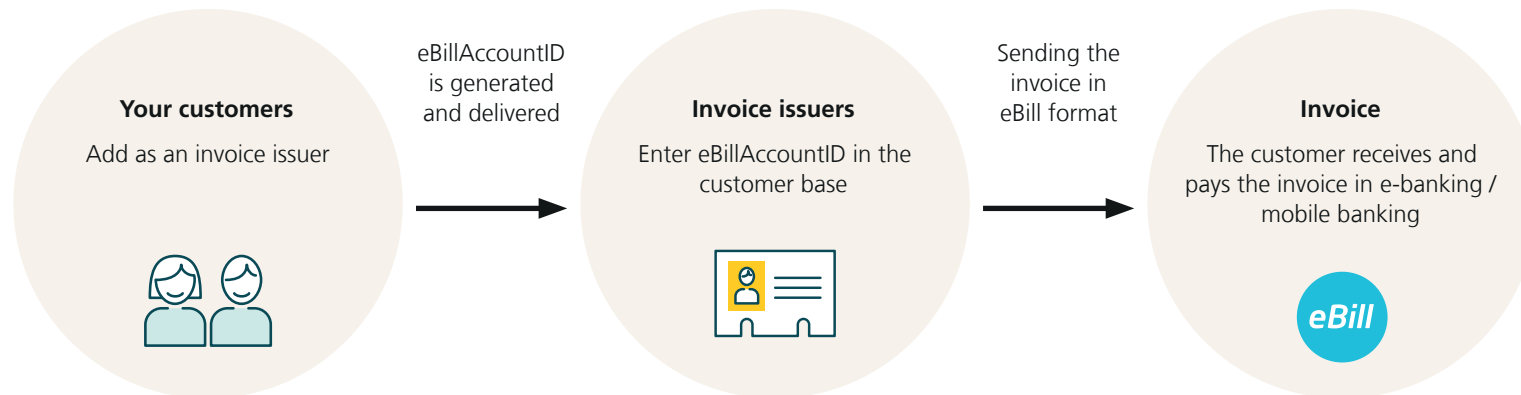

### What you need to do

Enter the eBillAccountID generated in your system into the invoice recipient's customer base. By entering the eBillAccountID, you are enabling your customers to receive their invoices as eBill invoices, and future invoices will be sent directly to them in digital form.

### Recommendations

Make sure that the data is downloaded automatically and direct changes to your customers' invoicing channels are applied at least once a day, or at a minimum, before billing runs.

If this download is not automated, establish a process to download and process these registration logs manually on a regular basis.

## Use your own sales processes

### Best practice 5

As an invoice issuer, you don't have to wait for your invoice recipients to register for eBill via online or mobile banking. Instead, you have the option to integrate eBill directly into your sales processes and initiate eBill usage yourself, e.g. in your customer portal or the checkout process in your online shop.

By integrating eBill registration into your portals, you save your customers any media disruptions. Additionally, you also reduce the number of times your customers are redirected seeing as they don't have to be redirected to an external eBill registration site.

Tip: Use the PostFinance web service to benefit from this function!

# Example: checkout in the online shop

## Best practice 5 – eBill registration via your own sales processes

As a company, you can integrate eBill directly into your sales processes, and in doing so encourage eBill usage yourself, e.g. in your own customer portal or during your online shop's checkout process. This helps avoid media disruptions and it saves your customers from being redirected to other websites.

1. The invoice recipient is in the customer portal or checking out in the invoice issuer's online shop and selects eBill as a payment method.

2. The invoice recipient enters their eBill e-mail address.

3. The invoice recipient receives an e-mail with an activation code.

4. The invoice recipient enters the activation code in the customer portal or when checking out in the online shop.

5. The invoice recipient has been successfully registered with the invoice issuer.

6. The first or next invoice can be delivered via eBill.

### Preconditions

- As the invoice issuer, you must integrate the function in your own customer portal/online shop.
- The invoice recipient must be registered for eBill and enter the correct eBill e-mail address.
