

POS bundle, POS Payment Module for Checkout Flex and All-in-One

Flexible and simple solutions for on-site payment collection

A terminal for on-site payment collection is less effort than you might think. These days, a terminal can be configured very easily in just a few clicks. The right payment methods for your customers have to be integrated separately.

With our POS Payment Modules for *Checkout Flex* or *Checkout All-in-One* and the *POS bundle*, we offer three different options for integrating our PAX terminals into your checkout solution.

Why use the POS Payment Module for Checkout All-in-One?

For small retailers, we recommend the POS Payment Module for Checkout All-in-One with one of our modern PAX terminals. You benefit from only having to conclude one contract for all payment methods and from receiving the preconfigured payment methods at a standard transaction fee of 1.7 percent.

We are happy to handle the administrative work involved in concluding the contract for the various payment methods.

Why use the POS Payment Module for Checkout Flex?

For medium and large retailers, we recommend the POS Payment Module for Checkout Flex with one of our modern PAX terminals. This gives you plenty of freedom in your choice of acceptance partner and the range of payment methods. Via our Checkout back office, you can request quotations from the integrated acceptance partners and receive individual quotations directly, with conditions that vary from one payment method to the next.

New POS bundle: combining payment with banking

With our POS bundle, we combine payment and banking. The benefits here include attractive discounts for Combo payment methods and selling prices for our PAX payment terminals, as well as the added bonus of waived account management and annual fees for the business account and your PostFinance Card.

Integration into your checkout system

You can integrate our payment terminals into any modern checkout system at the point of sale. The following options are available for this:

Three direct checkout integration options:

- Local Till Interface (LTI)
- Android Till Interface (ATI)
- Cloud Till Interface (CTI)

Two further communication protocols for indirect integration of your checkout solution:

- via Pepper
- via ZVT and OPI

Please contact your provider for integration into your checkout system.

Always at your side: self-service support

Answers to FAQs about all payment methods, the use of the Checkout back office tool and the installation of terminals can be found in the Checkout support area on our website.

Any questions? We're here for you around the clock.

Our personal technical support is available to our Checkout customers around the clock on 0848 382 423 (max. CHF 0.08/min. within Switzerland).
